ATP yield per Glucose	
2 (net)	--Glycolysis (-2 ATP + 4 ATP)
2 (GTP)	--Kreb's Cycle
Oxidative Phosphorylation	
4	from the 2 NADH in Glycolysis (via the shuttle)
6	from the 2 NADH in Decarbo. of Pyr.
4	from the 2 FADH ₂ in Kreb's Cycle
18	from the 6 NADH in Kreb's Cycle
36 = Net ATP's/Glucose	

All in the Mito
